I spend a great deal of time traveling and a lot of that travel in Phoenix. I have Satelite radio for one and only one reason. It provides the type and level of programming that I cannot receive from traditional radio stations. I prefer to pay for the service rather than have to listen to what seem to be becoming endless streams of advertizements.

The traffic and weather channels are a new innovation that I find extremely informative and helpful. I don't doubt that commercial radio considers this a threat since they choose not to provide these services.

I support satelite radio. As a consumer and a voter I feel that it is my right to receive this service and I am willing to pay for it.
